

6200

Examination and
treatment chair with
power hydraulic base
and manual recline

Rehance®

6200

Manual recline chair with power hydraulic base.

The Model 6200 is designed for effortless and efficient operation from both sides of the chair.

Power Hydraulic Base

Finger switches on both sides of chair and corded foot switch help you maintain contact with the patient and eliminate wasted movements.

Manual Articulating Top

A patented recline bar, which is easily grasped from both sides of the chair, reclines the back when depressed and raises it when returned to the upright position. You may choose to keep the apron and footstep stationery when operating the back or have them elevate to form a table. Pneumatic assist makes top operation effortless even from the seated position.

Dual Side Operation

For your comfort and efficiency, chair design enables practitioner to execute any chair function from either side and still maintain patient contact.

Finishes And Upholstery

Hand-sewn upholstery with high density foam holds its shape for years. Cushions remove for rapid cleaning and replacement. Match any office or treatment room décor with our selection of 14 easy-to-maintain vinyl colors. Base is available in standard colors: #15 Silver Smoke or #17 Light Beige. All materials are fire retardant. To request a color selection card, contact your dealer or call Reliance at 1-800-735-0357.

Armrests

Upholstered armrests lock in place for patient security and comfort. Release mechanism unlocks them for convenient ingress and egress from either side of chair.

Headrest

Concave upholstered headrest easily adjusts, locks firmly in place and unlocks with a single hand. Wide range of vertical and axial positions. Provides superior head and neck support. Pillow headrest and articulating pillow headrest are available as options.

Dual Rotation Locks

Easily accessible levers located on both sides of seat enable practitioner to swivel chair 330° without changing position.

Large Hinged Footstep

The 8" x 13" footstep can support patient's full weight and offers safe ingress and egress. Tilts out of way when desired.

Dimensions and Specifications

Top and base are shipped together for easy installation. Choice of two base heights: HIGH: 21 1/2" lowered, 33" raised; LOW: 19" lowered, 28" raised. Base: 22 1/8" x 24 1/4". Width: 24 1/4".
