

Retinal Photography Cost Analysis Worksheet

For proper documentation, a photograph of the fundus is taken with a retinal camera, printed and placed in the patient's clinical record. If pathology is being documented the procedure is reimbursable under standard CPT codes. The doctor may elect to charge the patient directly for the screening service.

Revenue Analysis:

Equipment Cost \$23,990 (price varies by camera)
Lease Term 60 Months
Monthly Payment Approx. \$500.00 per month (plus sales tax)
(amounts shown are typical but are for reference purposes and may vary)

Monthly Revenue:

External (92285) _____ x \$38 per patient = \$ _____ per month
Fundus (92250) _____ x \$68 per patient = \$ _____ per month
Patient Charged Screening _____ x \$25 per patient = \$ _____ per month

Total Monthly Revenue \$ _____
Monthly Payment \$ _____ (Plus sales tax)

Monthly Net Profit \$ _____ x 12 = _____
