

Master-Vu

TURN YOUR COMPUTER INTO AN ULTRASOUND INSTRUMENT.

Quick and easy USB connection to any Windows PC*

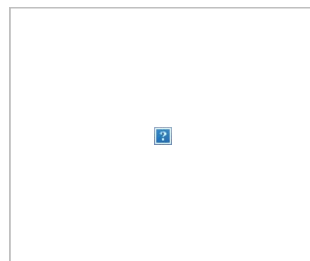

A-SCAN. B-SCAN.

Or Both.

A-SCAN

Immersion or direct contact A-scan
Manual or automatic capture (cataract, dense cataract, aphakic, silicone oil, and pseudophakic modes)
Auto calculation of axial length, anterior chamber depth, lens thickness, and vitreous, with axial length average and standard deviation provided for up to 5scans per exam
Standard IOL formulas: Binkhorst, Regression-II, Theoretic/T, Holladay, Hoffer-Q, and Haigis (optional)
Post-refractive IOL formulas include Laskany Myopic Regression, Laskany Hyperopic, and Aramberri Double-K

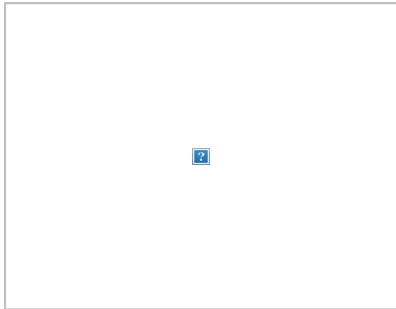

B-SCAN

Capture both still images and video clips with frame-by-frame review
On-probe activation and capture of scans
12 MHz focused transducer probe, sealed with virtually no sound
Near-, mid-, and far-gain and TVG controls
Live B-scan display with simultaneous selectable A-scan vector
On-screen annotation capabilities, including measurements
Continuous zoom and controlled image pan

PORTABILITY.

Just pack and go. Both the Master-Vu A-Scan and B-Scan come with compact carrying cases for easy transport and license to install software on multiple computers.

THE TOOLS YOU NEED.

Essential tools for managing patients and their ultrasound images.
